Finite-T disconnection of the moving branch at $T_N = 20$ MeV
isobar $P_Q = P_N$
$h_Q/n_{B,Q} = h_N/n_{B,N}$
solved moving endpoint
static coexistence reference
$m = 0.030$: no finite-speed endpoint
$\mu_{B,Q} = 1162.67$ MeV
$\Delta h = +2.08$ MeV
solved static coexistence (m=0)
$m = 0.100$: moving endpoint solved
$\mu_{B,Q} = 1184.45$ MeV
$\Delta h = -2.55$ MeV
solved moving endpoint
